

## About the project

### PRO.active CARE F.or U.sers L.ife

Elderly and vulnerable people wish to be taken care of in their homes. But technical solutions to support independent living of people in need of care are often missing, especially in rural regions. The PROCAREFUL project wants to improve the situation by developing a new model for hybrid homecare services. The partners work on a solution that combines face-to-face care with remote and digital support based on machine learning and artificial intelligence. The deployment of the model is tested in five regions.

This project is supported by the **Interreg Central Europe Programme** with co-financing from the European Regional Development Plan.

**Project duration: 03.2023 – 02.2026**

**Project Budget 2,29m €**  
**80% of the Budget is funded by ERDF**

**Target audience of the project: adults (+55 years old) and older people, caregivers/ carers, professionals, relevant stakeholders.**

## Partners

**Lead Partner**  
**INSTITUTE FOR OLDER CARE AND SHELTERED HOMES**

**Partner**  
**Association Mi**

**Partner**  
**Welfare organization for Baden-Württemberg**

**Partner**  
**Municipality of Log - Dragomer**

**Partner**  
**Central European Initiative – Executive Secretariat**

**Partner**  
**IFKA Public Benefit Nonprofit Ltd.**

**Partner**  
**Polish Foundation of the Opportunities Industrialization Centers "OIC Poland"**

**Partner**  
**Anton Trstenjak Institute of Gerontology and Intergenerational Relations**

**Partner**  
**Britenet Ltd.**

## Project status up to date

Over the past few months, we collaborated with the project partners to gather data on **tele-health, tele-care** and **hybrid solutions for long-term care provision in home environment**.

Drawing from the identified findings, we will develop **meta-analysis** and **experts ranking reports**, as well as a **hybrid homecare model** that combines both technology and human interaction components.

**We anticipate sharing the results soon.**

### Meta-Analysis

Meta-analysis on e-care, m-health solutions, benchmark projects and literature findings

COMING SOON

### Experts ranking

Analysis report that presents experts' ranking evaluation about the e-care, m-health home care

COMING SOON

## Upcoming events

### OUR SPEAKERS

**Oscar ZANUTTO**  
ISRAA Italy

**Ewelina Iwanek, Mateusz Pawelec**  
OIC Poland Foundation Poland

**Ana Ramovš**  
Inštitut Antona Trstenjaka Slovenia

### SPECIAL GUESTS

**Sonja Weigerstorfer**  
Deggendorf Institute of Technology, Germany  
DigiCare4CE project

**Jana Vanecek**  
Joint Secretariat of Interreg CENTRAL EUROPE

## Webinar

### Towards a Hybrid Home Care Model: the PROCAREFUL Project experience

**28.09.2023**

14:00 CET

\*registration required

## ABOUT WEBINAR

**PROCAREFUL** works towards the creation of a hybrid **home care service delivery** and responds to a new need to support the active and healthy ageing of a growing number of citizens. The Project aims at providing **solutions, models** and **technological tools** to care providers, policy makers, health and social care managers which face a progressive shrinking of the care work force.

The event will be an occasion to share best practices coming from mHealth and eHealth experiences currently available in the Interreg Central Europe area.

## WHO IS INVITED?

Policy makers, health and social care managers, practitioners working on adult and older care domains.

**We look forward to your participation and feedback!**
