

XVII International feed technology symposium

Serbia, Novi Sad, October 25-27, 2016

Co-funded by CEI Cooperation Fund

Reference number: 1202. 024-16

Announcement

XVII International feed technology symposium has been organized biannually since 1991. This year symposium aims to promote research, development, innovation and education within feed science and technology. The event will gather the representatives of universities and research institutes, but also feed producers and distributors, with a common aim - to promote research, development, innovation and education within feed science and technology.

The feed technology symposium gives an opportunity for feed scientists, researchers, technologists, producers and young scientists and students to present their results and findings, exchange information and ideas. It promotes networking and discussion about mutual cooperation, and provides a forum between academia and industry.

XVII International feed technology symposium will accentuate the challenges in the area of feed research. Program will be focused on the latest progress in fundamental and applied feed science, research and development, animal nutrition, quality and safety of raw materials and ingredients. The emphasis will be put on feed technology, processing and engineering. It will also cover the topics in functional additives application and food waste valorization for animal feed.

The ultimate aim of the Symposium is the dissemination of knowledge to the wider audience. It will highlight the importance of feed science as one of the most important strategic areas in European Union and Serbia, as well.

Information about venue, programme of the Symposium, registration, and other details can be found at web-page: <http://foodtech2016.uns.ac.rs/>

We look forward to seeing you at the XVII International feed technology symposium. We hope you will enjoy your stay and our hospitality in Novi Sad, Serbia, and benefit from the high scientific level of the Symposium.

Dr. Đuro Vukmirović,
President of the Organizing Board
